

Examples with NEPO under Open Roberta (find and load)

Here <https://lab.open-roberta.org> choose as Robot System **Calliope mini!**

Now click on GALLERY (Button with 4 open squares!)

Now write in the search field „Calliope“. Then load an example of your choice.

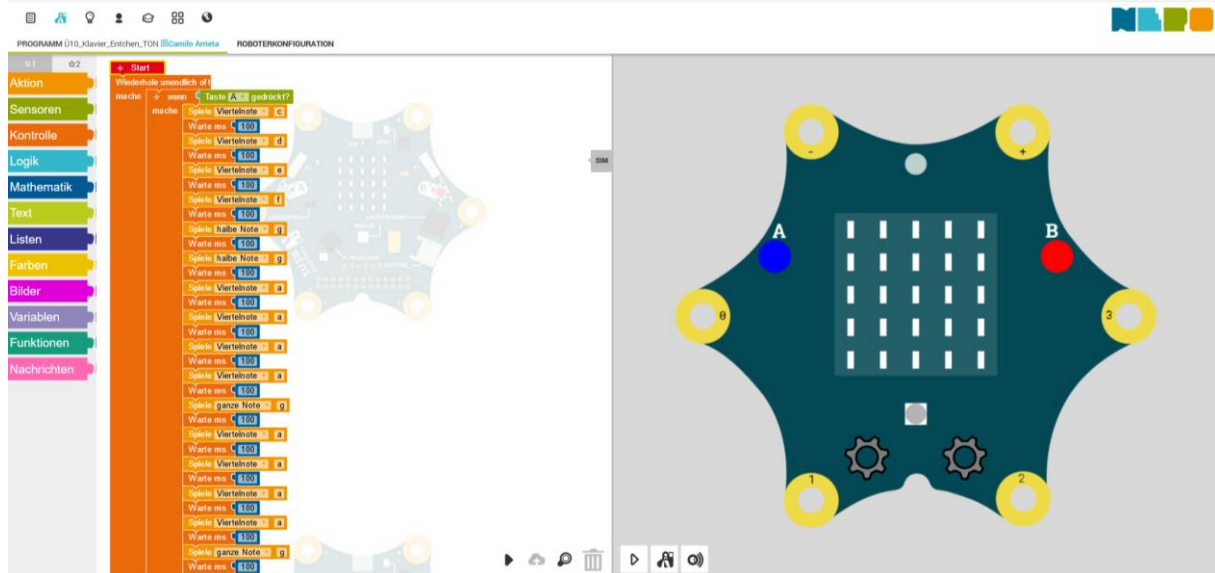

These programs you can run with SIM (Simulation).

Attention, on the right bottom of this site more interesting programs are available.

I have chosen Ü10_Klavier_Entchen_Ton.

You may change language to English, before you continue.

Click SIM!

Start SIM.

Clicke for start of Program on A (blue).

You may change programs, improve and (in case of connected) save under your name.

Have fun!

Holger Vogt
